Small Bowl VitruCell B039

cast glass, VitruCell technology

5 h × 13 w in (13 × 33 cm)

VitruCell technology represents a new method of casting glass in a mold using knowledge of modern technologies, especially in approaches to the chemical coloring of glass. The honeycomb structure of various dimensions is created by casting pre-prepared parts and glass fragments which are specially chemically treated.

Provenance: Pelechov, Zelezny Brod, Czech Republic, Donated by the artist

Estimate: \$2,500–3,500
